

**For Immediate Release**

## **Sabtech Announces Corporate Name Change to IXI Technology**

*New Branding Reflects Commitment to Expansion*

**YORBA LINDA, CALIF. – January 12, 2015** – Sabtech, an established leader in the design, manufacture and support of tactical data communications solutions for military and government agencies, today announced that it has changed its name to [IXI Technology](#). The new name comes on the heels of a change in ownership, and reflects a strategic approach to advanced technology as well as entering new industrial markets.

“We are now starting an exciting new era in the company,” said Michael Carter, Chief Executive Officer, IXI Technology. “The name is changing, but not our great people or our commitment to customers. We continue to focus on advanced communications technology, exceptional customer service, on-time delivery for the U.S. military and its allies. Due to the robustness of our specialized interface boards, rugged computer systems and test equipment, our technology is perfect for industrial applications as well. We look forward to continued strong growth in the months and years ahead.”

Since joining and then purchasing 100 percent of the company 11 months ago, Mr. Carter has revitalized the product line with new technology at the board and systems level, releasing more than 12 new designs. This is a commitment that IXI Technology intends to continue since more than a third of the company’s staff is dedicated to engineering. The company’s technology development efforts are concentrated on High Density Processors and Computing, Data I/O Conversion, Digital Data Links, High Definition Video Sensors and Processing, Emulation of Systems, and Advanced Software Algorithms.

The Board of Directors has also transitioned and now includes Roger Smith, former Assistant Secretary of the Navy for Acquisitions; Harry Halamandaris, former CEO of Litton Industries and John Stammreich, former Vice President of Global Strategy for Boeing.

As a testament to Sabtech's successful commitment to customer satisfaction, Raytheon Integrated Defense Systems recently recognized the company for its quality performance and services, awarding it a Four-Star Supplier Excellence Award.

For more information on IXI Technology's innovative communication system solutions, visit [www.ixitech.com](http://www.ixitech.com) or call 714-692-3800.

### **About IXI Technology**

Headquartered in Yorba Linda, California, [IXI Technology](#) excels in the design, manufacture and support of specialty data communications solutions for military and government agencies as well as for industrial applications. For almost 30 years, IXI Technology has successfully fulfilled a significant role in the defense of the United States and its allies by supplying innovative, highly reliable COTS products, including specialized interface boards, rugged computer systems, test equipment, and professional services for major combat and C5ISR systems worldwide. IXI Technology's comprehensive selection of MIL-STD based interface boards, systems and software enables governments worldwide to maximize resources as they work with today's complex systems.
